

Group II. Claims 6-10, drawn to a dispenser with a roller from assembly, classified in Class 225, subclass 51.

Group III. Claims 11-15, drawn to a dispenser with a transfer roller, classified in Class 242, subclass 560.

Group IV. Claims 16-23, drawn to a dispenser with a roller frame assembly and a transfer roller, classified in Class 225, subclass 34.

The Examiner stated as follows:

The inventions of Groups I and II are separate inventions. The inventions of Groups I and II are separate inventions. The inventions of Groups I and IV are separate inventions. The inventions of Groups II and III are separate inventions. The inventions of Groups II and IV are separate inventions. The inventions of Groups III and IV are separate inventions.

The Examiner also stated that because these inventions are distinct and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes is proper.

Applicants provisionally elect Group I, claims 1-5 drawn to a dispenser with improved actuator means.

July 29, 1997

Respectfully submitted,

Harry M. Levy
